Vector Renewables believes that digitalize the asset management services is paramount to meet the challenges that the RES industry poses.

As part of its digitalization strategy, VR performs its services using **NUO** ([www.nuoenergy.com](http://www.nuoenergy.com)), a digital asset management platform, which allows for a proper standardization, a partial automation of certain tasks and finally but most importantly a better understanding of data coming from the sites, ultimately contributing to deliver a faster and better service to our Clients.

## Asset Management – Our goals

Performance improvement

Contractual management and cost optimization

Revenues management (PPA, FiT)

Project Finance compliance

Strategies for aging portfolios
